

Space for Life shares the re-use, re-create and re-invent philosophy being adopted by many forward thinking interior design, décor and manufacturing ventures today.

Space for Life speaks of space for living as well as re-evaluates our pace of life with the green and red in our logo significant of the colours of life.

We bring beautifully designed and well-crafted furniture pieces from the fifties and younger, made by gifted Scandinavian designers and crafters, to an appreciative South African audience.

What is considered by some as out-dated and not part of our current popular contemporary world, ironically manages to take its place very successfully integrated and notably reflecting a considerable amount of personality in amongst what is seen as contemporary today.

Space for Life also has a range of Scandinavian designed and made ceramics and glass object 'art, such as table and floor standing lamps, vases and bowls as well as home ware that include wood & stainless steel bowls, dishes and trays.

Our philosophy and mission is also to support and create opportunities for local artists and crafters who show talent and dedication. We combine their work with the Scandinavian design items to illustrate harmony and poise between our various cultures.

The upholstery work requirements, for instance, are done by a small home-based enterprise. We support local ceramists and offer a range of hand-made, hand-painted vases and bowls by Cape Town based ceramic artists.

The featured artists are South African established and up-and-coming regional talent, individuals who show considerable talent and require representation in order for their work to be appreciated.

In addition to being a gallery and retail outlet, Space for Life also offers a comprehensive interior design and décor service with a qualified and experienced interior designer always on duty. The interior design service include aspects such as custom made furniture design and manufacture, space planning and layout, drawings and project management. The décor services include window treatments, all upholstery work, and soft furnishings.

Space for Life Art is continuously searching for outstanding furniture and art which is then creatively displayed in our light and spacious showroom gallery, in a manner that aims to strike the right balance between furniture, art and design.

Acquiring a Space for Life, carefully selected and handcrafted piece speaks about you and who you are.
